SKILLS

- Object-Oriented Programming
- Algorithms
- Data Structures
- REST API Integration
- SQL & Database Design
- File System Operations
- Error & Exception Handling
- Networking Fundamentals
- Debugging & Troubleshooting
- Version Control (Git)
- Automation & Scripting
- Software Design Principles
- JSON Data Processing
- SQL Database Management
- Web Development

HOBBIES

- YouTube Video Explainers
- Video Editing
- Photo / Image Design
- Creative Writing
- Traditional / Digital Drawing
- Exercise & Workout

LANGUAGES

- English | Fluent
- Sepedi | Fluent

PROFILE

Computer Science student with a strong interest in backend development, automation, Python, Java, and web development. Passionate about building practical software solutions that integrate APIs, automate repetitive tasks, and process data efficiently to solve real-world problems and improve user experience.

EDUCATION

- Matric / Grade 12 @ Lethabong Secondary School**
 - Class of 2021.
 - Academic transcript/NSC available upon request.
- Diploma in Computer Science @ Tshwane University of Technology**
 - 2023 – Expected Graduation: 2027.
 - Academic Record available upon request.

EXPERIENCE / PROJECTS

SOFTWARE DEVELOPMENT

- Designed, developed, and deployed multiple websites, including my personal portfolio, using HTML, CSS, and JavaScript.
- Developed desktop applications in Python with networking capabilities and REST API integration.
- Created an automated LyricsFinder application that uses the mutagen library to detect currently playing media, display track information and embedded lyrics, and automatically retrieve and embed missing ID3 lyrics through an online lyrics API.
- Find my projects on my Portfolio and/or GitHub.**

PROGRAMMING LANGUAGES

- Python
- Java / Spring
- HTML / CSS / JavaScript
- C#
